

CONTRACTOR FACT SHEET

Contractors and permits on CBA projects

December 2, 2022

BCIB's role is to supply skilled construction workforce to contractors on the projects.

On a CBA project, the Prime Contractor tells BCIB who the subcontractors will be. BCIB does not select contractors or establish commercial agreements with contractors on projects.

Contractors manage the procurement process and award contracts to companies. BCIB doesn't get involved in that process.

In order for a company to be issued a permit, that company must first have been awarded work by a contractor. That contractor can then request a permit, and that request will be reviewed by the Affiliated Unions.
